PARAMETER	LIMIT
-----------	-------

Description	Clear coloured solution.
-------------	--------------------------

Solubility	Miscible with water.
------------	----------------------

Normality	0.1N ± 0.002
-----------	--------------

(After diluting total solution to 500 ml with distilled water, at 27°C.)

Direction for use and storage : Capsule

- For opening this new capsule bottle, hold it horizontally with white part in left hand and yellow part in right hand. Then bend gently as if you are breaking it apart. This will smoothly open the capsule.
- Open the internal yellow PP cap, carefully remove the plug and transfer the contents of the capsule into a 500 ml standard volumetric flask of Class A grade. Rinse the bottle from inside with distilled water replacing again the plug. Transfer the rinsing to the flask. Make up volume up to the mark with distilled water at 27°C. Stopper the flask and mix thoroughly.
- Note down the normality and date of preparation of the solution on the sticker label provided in the pack. Affix the same on the bottle/flask.
- The unopened capsule bottles may be stored indefinitely without the contents deteriorating in strength or quality. (Solutions diluted for use should be kept under conditions of storage appropriate to volumetric and reagent solution).

Note(s) : Assay (if applicable) method mentioned.

WARNING

Hazard statements : Causes mild skin irritation.

Precautionary statements

Prevention: -----

Response: If skin irritation occurs: Get medical advice/ attention.

IMDG Code :

UN No. :

IATA :

Disposal: Dissolve the chemical to be disposed, in water and allow it to run to waste, diluting with large quantities of water
