Technical Information

BM-2 Terrestrial Orchid Medium

With Vitamins, Sucrose, Casein hydrolysate, 6-BAP and Agar

Product Code: PT1064

Application: BM-2 Terrestrial Orchid Medium has been specially formulated for the *in vitro* culture of the terrestrial orchid. It is a nutrient blend of inorganic salts, vitamins, amino acid, carbohydrate and gelling agent. In addition, it is supplemented with casein hydrolysate which is ideal for improved germination, early protocorm formation and seedling development. L-glutamine and glycine serves as sources of organic nitrogen. Microelements like Manganese, Molybdenum, Copper, Iron and Zinc enhance metabolism in the plants. Boron plays a key role in the carbohydrate metabolism. Thiamine, pyridoxine, nicotinic acid act as enzymatic cofactors in universal pathways including glycolysis and TCA cycle along with the primary and secondary metabolism in the plants. 6-BAP aids in the cell division and differentiation of the plant tissue.

The product is plant tissue culture tested but it is the sole responsibility of the user to ensure the suitability of the medium for individual species.

| Composition** | |
|--------------------------------|----------------|
| Ingredients | mg/Litre |
| MACROELEMENTS | |
| Magnesium sulphate | 100.000 |
| Potassium phosphate monobasic | 300.000 |
| MICROELEMENTS | |
| Boric acid | 10.000 |
| Copper sulphate pentahydrate | 0.025 |
| Cobalt chloride hexahydrate | 0.025 |
| EDTA disodium salt dehydrate | 37.250 |
| Ferrous sulphate heptahydrate | 27.850 |
| Manganese sulphate monohydrate | 25.000 |
| Molybdic acid (sodium salt) | 0.213 |
| Zinc sulphate heptahydrate | 10.000 |
| VITAMINS | |
| Biotin | 0.050 |
| Folic acid | 0.500 |
| myo-Inositol | 100.000 |
| Nicotinic acid (free acid) | 5.000 |
| Pyridoxine HCl | 0.500 |
| Thiamine hydrochloride | 0.500 |
| AMINO ACID | |
| Glycine | 2.000 |
| L-Glutamine | 100.000 |
| CARBOHYDRATE | |
| Sucrose | 20000.000 |
| GELLING AGENT | |
| Agar | 6000.000 |
| OTHERS | |
| 6-Benzylaminopurine | 0.200 |
| Casein hydrolysate | 500.000 |
| Total | 27.2 gms/litre |
| | |

Plant Tissue Culture

Product Specification

cdhfinechemical.com

Material required but not provided

- Autoclaved distilled water
- Plant growth regulators
- 1N NaOH/HCl

Quality Control

Appearance

White to off-white, homogenous, free flowing powder

Solubility

27.2 gms/litre soluble in distilled water

Colour and Clarity

Colourless to light yellow solution, hazy gel is formed on cooling

Gelling

Firm gel formed at pH : 5.75 <u>+</u> 0.5

pH at 25ºC

5.20 – 6.20

Plant Tissue Culture Test

The growth promoting properties of medium is assessed by providing plant cultures with relative humidity of about 60%±2%, temperature 22ºC±2ºC and photoperiod of about 16:8. The plant species showed actively growing callus and shoots with no structural, necrotic and toxic deformity.

Directions

- Reconstitute medium by adding required quantity of powder in two-third of total volume with constant, gentle stirring till the medium gets completely dissolved.
- Add heat stable supplements prior to autoclaving.
- Make up the final volume with distilled water.
- Adjust the pH of the medium to 5.75 ± 0.5 using 1N NaOH/HCl.
- Add gelling agent and heat the medium to boiling till complete dissolution of gelling agent.
- Sterilize the medium by autoclaving at 15 lbs and 121°Cfor 15 min.
- Cool the autoclaved medium to about 45°C before adding heat labile supplements.
- Aseptically dispense the desired amount of medium under a laminar airflow unit in sterile culture vessels

Storage and Shelf Life

- The plant tissue culture medium powder is extremely hygroscopic and must be stored at 2-8°C in air tight containers.
- Preferably, entire content of each package should be used immediately after opening.
- Use before the expiry date.

Disclaimer

- User must ensure suitability of the product(s) in their application prior to use.
- The product conforms solely to the technical information provided in this booklet and to the best of knowledge research and development work carried at **CDH** is true and accurate.
- Central Drug House Pvt. Ltd. reserves the right to make changes to specifications and information related to the products at any time.
- Products are not intended for human or animal diagnostic or therapeutic use but for laboratory, research or further manufacturing of diagnostic reagents extra.
- Statements contained herein should not be considered as a warranty of any kind, expressed or implied, and no liability is
 accepted for infringement of any patents.
- Do not use the products if it fails to meet specifications for identity and performance parameters.

Precautions

- Ensure appropriate pH of the medium before addition of gelling agent as acidic pH will lead to decreased gelation resulting in semi solid flowing gel while alkaline pH will lead to formation of hardened gel.
- Use of Distilled water/Tissue culture grade water is recommended for media preparation as tap water or lower grade water may lead to salt precipitation and improper gelation.
- Avoid preparation of concentrated solutions, as it will lead to precipitation of salts.
