## Technical Information

## Dulbecco's Modified Eagle Medium (DMEM)

 Liquid Cell Culture Medium

## Product Code: AL1007A

Application:-Dulbecco's Modified Eagle Medium (DMEM) is one of the most widely used modification of Eagle's medium. DMEM is a modification of Basal Medium Eagle (BME) that contains four fold concentration of amino acids and vitamins. Additionally, the formulation also includes glycine, serine and ferric nitrate. The original formulation contains $1000 \mathrm{mg} / \mathrm{L}$ of glucose and was originally used to culture embryonic mouse cells.
DMEM high glucose is a further modification of original DMEM and contains $4500 \mathrm{mg} / \mathrm{L}$ of glucose. The additional glucose has proved to be useful in cultivating various other cell lines including primary cultures of mouse and chicken cells as well as various normal and transformed cell lines.
AL1007A is Dulbecco's Modified Eagle Medium with 4.5 gms glucose per litre, L-glutamine, 3.7 gms per litre sodium bicarbonate and sodium pyruvate. Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific for different cell lines.
