RPMI- 1640

With L-Glutamine and Sodium bicarbonate Without Glucose and HEPES

Product Code: AL1150A

Application:- Roswell Park Memorial Institute (RPMI) media are a series of media developed by Moore et al for the culture of human normal and neoplastic cells in vitro. RPMI-1640 is the most commonly used medium in the series. A modification of McCoy's 5A medium, the medium was specifically designed to support the growth of human lymphoblastoid cells in suspension culture. Presently the medium is extensively used for a wide range of anchorage dependant cell lines. The medium needs to be supplemented with 5-20% fetal bovine serum. The medium is also known to support growth of cells in the absence of serum.

AL1150A is RPMI-1640 medium supplemented with L-glutamine and sodium bicarbonate. It does not contain glucose and HEPES. Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific for different cell lines.
