

## Technical Information

### SD Growth Medium w/o LEU

#### Product Code: G1065

SD Growth Medium w/o LEU is a synthetic defined media for the growth of *Saccharomyces cerevisiae*.

#### Composition\*\*

Ingredients	Grams/Litre
Potassium dihydrogen phosphate	1.00
Magnesium sulphate	0.50
Sodium chloride	0.10
Calcium chloride	0.10
D-Biotin	0.002 gm
Calcium pantothenate	0.4 mg
Folic acid	0.002 mg
Inositol	2.00 mg
Niacin	0.4 mg
PABA	0.2 mg
Pyridoxin, HCl	0.4 mg
Riboflavin	0.2 mg
Thiamine HCl	0.4 mg
Boric acid	0.5 mg
Copper sulphate	0.04 mg
Potassium iodide	0.1 mg
Ferric chloride	0.2 mg
Manganese sulphate	0.4 mg
Sodium molybdate	0.2 mg
Zinc sulphate	0.4 mg
Ammonium sulphate	5.00
Dextrose	20.00
Adenine	0.010
L-Arginine HCl	0.050
L-Aspartic acid	0.080
L-Histidine HCl	0.020
L-Isoleucine	0.050
L-Leucine	0.100
L-Lysine HCl	0.050
L-Methionine	0.020
L-Phenylalanine	0.050
L-Threonine	0.100
L-Tryptophan	0.050
L-Tyrosine	0.050
Uracil	0.020
L-Valine	0.140

\*\* Formula adjusted, standardized to suit performance parameters

#### Methodology

Suspend 27.39 grams in 1000 ml distilled water. Sterilize by autoclaving at 10 lbs pressure (115°C) for 20 minutes. Mix well and dispense as desired.

## Principle and Interpretation

SD Growth Medium w/o LEU is a synthetic defined media for the selective growth of *Saccharomyces cerevisiae*. Synthetically Defined media known as Yeast Nitrogen Base Media for the growth of Yeast cells were first cited by Wickerham (1, 2). Synthetic defined Growth Medium w/o LEU include a yeast nitrogen base along with ammonium sulfate, and dextrose as the carbon source, which is further supplemented with various amino acids except leucine which makes it a dropout growth medium for yeast cells. A leucine auxotrophic yeast mutant cannot grow on this media but a wild-type or a leucine prototrophic yeast strain can grow. The leucine auxotroph has a mutation in a gene (e.g. *LEU2*) of the leucine synthesis pathway and this mutant strain will grow in this medium if leucine is supplied from outside e.g. from a plasmid which contains *LEU2* gene (3). For this purpose, a *leu2* mutant strain of *S. cerevisiae* is transformed with a *LEU2* containing plasmid and the transformants can be selected by growing the cells on SD Growth Media w/o LEU. Hence this medium is very useful in molecular genetics.

## Quality control

### Appearance of Powder :

White to cream coloured, homogeneous, free flowing powder.

### Colour and Clarity of prepared medium :

Pale yellow coloured, clear solution without any precipitate.

### Cultural Response :

Cultural characteristics observed after an incubation at 25-30°C for 18 - 48 hours.

### Organisms (ATCC)

*Saccharomyces cerevisiae* ATCC 9763

### Growth

good-luxuriant

## Storage and Shelf Life

- Upon receipt, store at 2 - 8°C. Use before expiry date on the label.
