PRODUCT CODE	1-NAPHTHYLAMINE PRACT	
	167565	
SYNONYMS	(1-Aminonaphthalene,α-Naphthylamine)	
C.I. NO.	_	
CASR NO.	[134-32-7]	NIEL
ATOMIC OR MOLECULARFORMULA	C ₁₀ H ₉ N	NH ₂
ATOMIC OR MOLECULARWEIGHT	143.19	
PROPERTIES	White crystals becoming red on exposure to air, Reduction of -nitro- naphthalene with iron and hydrochloric acid.	
PARAMETER	LIMIT	
Description	Tan to purple colour crystals or crystalline powder.	
Solubility	33.3 mg soluble in 1 ml of methanol.	
Assay (GC)	About 98.0%	
Melting Point	47°- 50°C	
MAXIMUM LIMIT OF IMPURITY		
2-Naphthylamine (GC)	0.2%	
Note(s) : Assay (if applicable) method mention	ned.	
inhalation. May damage the unborn child. Cause inhalation Very toxic to aquatic life. Very toxic Precautionary statements Prevention: Obtain special instructions before	rgic skin reaction. May cause genetic defects. May cause cancer by ses damage to organs through prolonged or repeated exposure by c to aquatic life with long lasting effects. use. Do not handle until all safety precautions have been read and ist/ vapours/spray. Avoid breathing dust/fume/gas/mist/ g. Do not eat, drink or smoke when using this product. Use only	IATA : 6.1

Replace date : 03-June-2022
